The Shared World Sep 05 2021 A novel treatment of the capacity for shared attention, joint action, and perceptual
common knowledge. In The Shared World, Axel Seemann offers a new treatment of the capacity to perceive, act,
and know about the world together with others. Seemann argues that creatures capable of joint attention stand in a
unique perceptual and epistemic relation to their surroundings; they operate in an environment that they, through
their communication with their fellow perceivers, help constitute. Seemann shows that this relation can be marshaled
to address a range of questions about the social aspect of the mind and its perceptual and cognitive capacities.
Seemann begins with a conceptual question about a complex kind of sociocognitive phenomenon—perceptual
knowledge—and develops an empirically informed account of the spatial structure of the environment in and about
which such knowledge is possible. In the course of his argument, he addresses such topics as demonstrative reference
in communication, common knowledge about jointly perceived objects, and spatial awareness in joint perception
action.

Church Dogmatics The Doctrine of Creation, Volume 3 Apr 04 2021 Described by Pope Pius XII as the most
important theologian since Thomas Aquinas, the Swiss pastor and theologian, Karl Barth, continues to be a major
influence on students, scholars and preachers today. Barth's theology found its expression mainly through his
reasoned fourteen-part magnum opus, Die Kirchliche Dogmatik. Having taken over 30 years to write, the Church
Dogmatics is regarded as one of the most important theological works of all time, and represents the pinnacle of
Barth's achievement as a theologian. T&T Clark International is now proud to be publishing the only complete
English translation of the Church Dogmatics in paperback.
