Crafting Your Research Future Dec 09 2021 What is it like to be a researcher or a scientist? For young people, including graduate students and junior faculty members in universities, how can they identify good ideas for research? How do they conduct solid research to verify and realize their new ideas? How can they formulate their ideas and research results into high-quality articles, and publish them in highly competitive journals and conferences? What are effective ways to supervise graduate students so that they can establish themselves quickly in their research careers? In this book, Ling and Yang answer these questions in a step-by-step manner with specific and concrete examples from their first-hand research experience. [Handbuilt, A Potter's Guide](#) Apr 20 2020 In *Handbuilt, A Potter's Guide*, pottery expert Melissa Weiss shows you the basics of crafting without a wheel, how to harvest and work wild clay, and using natural glazes.

Handbuilt pottery is the perfect way for new potters to dive into this unique medium because it doesn't require access to a potter's wheel. In *Handbuilt, A Potter's Guide*, Melissa Weiss takes an organic approach to harvesting and working with local clays, and even shows you how to mix your own glazes to use on functional pottery for use at home. Students of pottery the world over have traveled to North Carolina to attend Weiss's classes. Now you don't have to! In this book, Melissa provides you with a solid course on slab and pinch-pot techniques that allow beginning students to master the basics and progress through finished wares. Looking to go a little deeper? Melissa also offers her unique knowledge of how to dig and process local clays for use in pottery, and for the techniques she has developed for creating unique glazes with ash, salt, and other dry materials. Melissa will also introduce you talented contemporary potters, who will share their work, tips, advice, and techniques. Learn the basics of handbuilding and more with this engaging guide.

[A Guide to Leading and Managing Indiana School Facilities](#) Jul 04 2021 When school buildings are aging, a decision must be made as to whether to continue to maintain the existing building, renovate building, or build new. Very seldom is extending the existing buildings life over building a new building. If renovation costs exceed 50% of the cost of new construction, it is better to build instead of renovating. The taxpayers in your community will have much to say on whether to renovate or build new. Much emphasis should be given to taxpayer input before the school board makes a final decision. School administrators are responsible to the community for maintaining school buildings and they owe an explanation to the community of what has been done to protect existing school buildings. This book is developed to help aspiring teachers who want to become principals, business managers or superintendents, that existing buildings need to be properly maintained and functional and can continue to serve the public for many years to come.
