This book presents 50 case studies and technical notes in finance, targeted toward upper-level undergraduates and introductory and intermediate-level MBA students. The purpose of these cases is to afford the basis for classroom discussion of tools and concepts. The range of topics includes value creation, market efficiency, economic profit, financial analysis and forecasting, cost of capital, capital budgeting, dividend policy, equity issuance, capital structure management, derivative securities, and mergers and acquisitions. The spirit of these cases is to link the study of value creation with a respect for the administrative point of view, and an orientation toward capital markets. Three-quarters of the cases are set in 2000 or after; half the cases are set outside of the United States or draw significantly on international issues; 37 percent are new or seriously updated since the fourth edition. A new chapter addresses ethics in finance. Note: The downloadable document describes the book in more detail with excerpts from the preface and table of contents. Also, an Instructor's Manual containing discussion outlines and case analyses is available on a restricted basis to university instructors upon request to Ms. Barbara Hari, McGraw-Hill/Irwin (mailto:Barbara\_Hari@mcgraw-hill.com). A collection of spreadsheet files supporting student and teacher preparation of the cases is available to instructors adopting the book for classroom use. Strategic Management: Text and Cases, 2nd Edition, by Dess/Lumpkin/Eisner is both readable and rigorous - written for today's student. A rocket-ship in its first edition, the revision continues to provide

solid treatment of traditional topics in strategic management, as well as contemporary topics like entrepreneurship, knowledge management, and internet strategies. The prestigious author team understands the importance of thorough, modern concepts illustrated by rich, relevant and teachable cases. The new case selections emphasize variety, currency, and familiar company names. The cases are up-to-date in terms of both financial data and strategic issues. This group of cases gives both instructors and students unparalleled quality and variety. Based on consistent reviewer feedback, these selections combine comprehensive and shorter length cases about well known companies. A unique case-based molecular approach to understanding pathology

A case-based companion study guide to Pharmacotherapy Principles and Practice, 2e – learn how to apply your knowledge to actual patient situations Pharmacotherapy Principles and Practice Study Guide uses 98 cases to help you learn how to apply pharmacotherapeutic concepts to specific patient situations. Each case is presented in a consistent manner, similar to what you would see in a clinical setting and focuses on one primary topic or problem. Patients discussed in these cases will have drug therapy problems requiring identification and management. For each case, you will be asked to develop a Patient Database, Drug Therapy Problem Worksheet, and Pharmacotherapy Care Plan using the forms provided. These forms are adapted from those originally developed by the American Society of Health System Pharmacists Clinical Skills program. Each case includes: Learning Objectives Patient Presentation Targeted Questions followed by a hint that refers you to pages in Pharmacotherapy Principles and Practice, 2e where you can find the information to answer the question Follow-up Global Perspective which highlights an issue related to the case that is important to countries outside of North America or involve different ethnic groups or races Case Summary Strategic Management of Technological Innovation, 4e by Melissa Schilling is the first comprehensive and rigorous, yet accessible text for the Technology and Innovation Management course. Unlike other books, Schilling's approach synthesizes the major research in the field, providing students with the knowledge needed to enhance case discussion and analysis. The subject is approached as a strategic process, and as such, is organized to mirror the strategic management process used in most strategy textbooks, progressing from assessing the competitive dynamics of a situation, to strategy formulation, to strategy implementation. As a brief, affordable paperback, it is ideal to package with cases. Recommended case sets from the author are available through McGraw-Hill Create or from the Harvard Business School Case Database. STRATEGIC MANAGEMENT: Creating Competitive Advantages, 3/e, by Dess, Lumpkin, and Eisner, responds to the demands of today's rapidly changing and unpredictable global marketplace that students will face when they

enter the business world. The concepts-only text provides students with a timely, rigorous, and relevant book written in an engaging manner to spur their interest and excitement. This book provides a solid treatment of traditional topics in strategic management as well as contemporary topics such as entrepreneurship, knowledge management, and e-commerce and internet strategies. Numerous applications from business practice plus sidebars (approximately six per chapter) bring key concepts to life. Instructors can create their own case volumes for use with Strategic Management 3rd Edition from a variety of source- pre-selected case packets, customizing from a recommended set which have been carefully mapped to the chapter concepts, or from the entire Primis database which features cases from Harvard, Darden, INSEAD, Ivey, and other reputable sources. Providing comprehensive coverage of electronic commerce and business strategy, this textbook utilises case studies which enhance understanding of the topics covered. Case Problems in Finance is a Harvard case course presenting real business situations that pose debatable alternative courses of action. The cases contain problems that can be narrowed but not always settled by the usual techniques of financial analysis. It will teach students to discover ways of thinking that are productive in handling different types of managerial problems intelligently. The cases are grouped by major topics: financial analysis and forecasting, cost of capital, working capital management, capital budgeting, dividend policy, debt policy, financial execution, and mergers and restructuring. Make simple sense of complex financial information! The high-profile accounting scandals of recent years have made one thing clear: You can't know too much about the company for which you work. What are the numbers? Where do you find them? How do they affect you and your staff? This fully revised and updated third edition of The McGraw-Hill 36-Hour Course: Finance for Nonfinancial Managers provides a firm grasp on what all the numbers really mean. Designed to let you learn at your own pace, it walks you through: The essential concepts of finance, so you can ask intelligent questions and understand the answers Vital statements and reports, with sections on pro forma financial statements and expensing of stock options The auditing process--what is measured, how it's measured, and how you can help ensure accuracy and completeness With chapter-ending quizzes and an online final exam, The McGraw-Hill 36-Hour Course: Finance for Nonfinancial Managers serves as a virtual professor, providing the curriculum you need to crunch the numbers like a pro! Readers are taken through the various stages in conducting case study research, including a helpful account of data collection and data analysis methods. Structured, narrative and descriptive approaches to writing case study reports are also discussed. Case Files: Pediatrics presents sixty real-life cases that illustrate essential concepts. Each case includes complete discussion, clinical pearls, references, definitions of key terms, and USMLE-style review questions with detailed explanations of the correct answers. "This is a modern multi-disciplinary text confronting a complex age and journey into recovery. It is a roadmap for every student of mental health who wants to put the most up-to-date practice fuel into their tank. The case study approach offers an authentic insight into life experiences of service users and allows the reader to re-think the relationship they have with vulnerable people in the middle of sensitive life challenges." Dr Dean-David Holyoake, University of Wolverhampton, UK This engaging book consists of 27 case

studies which offer a realistic and insightful view into the experience of mental ill-health. A range of mental health problems are considered for people at different stages of the lifespan, from common problems such as anxiety or depression, through to severe and enduring conditions such as schizophrenia. Part of a new Case Book series, the book is written in an informative and clear style and utilises the latest evidence-based interventions and resources. The approach adopted: Incorporates recovery based principles Emphasizes the importance of collaborative working Values the person's perspective Actively empowers and advocates for the person to make their own decisions and choices Written and edited by academic experts and experienced clinicians, the cases all take a positive, person-centred approach focusing on recovery outcomes. The book addresses the biological, psychological, social and physical aspects in scenarios and includes areas of mental health which are often overlooked, such as alcohol and substance misuse amongst older adults. Mental health nurse training involves focusing on working with individuals one-to-one in a range of settings, and this case book will reflect and complement the skills and situations students face while training and on placement. Contributors: Geoffrey Amoateng, Jean-Louis Ayivor, May Baker, Alison Coad, Hilary Ford, Sally Goldspink, John Harrison, Mark McGrath, Michael Nash, Cliff Riordan, Heather Rugg, Noel Sawyer, Vanessa Skinner, Steve Wood. "Case Studies in Finance" links managerial decisions to capital markets and the expectations of investors. At the core of almost all of the cases is a valuation task that requires students to look to financial markets for guidance in resolving the case problem. The focus on value helps managers understand the impact of the firm on the world around it. These cases also invite students to apply modern information technology to the analysis of managerial decisions. The closest a student can get to the wards without seeing patients! **Designing and Managing the Supply Chain, 3/e** provides state-of-the-art models, concepts, and solution methods that are important for the design, control, operation, and management of supply chain systems. In particular, the authors attempt to convey the intuition behind many key supply chain concepts and to provide simple techniques that can be used to analyze various aspects of the supply chain. Topical coverage reflects the authors' desire to introduce students to those aspects of supply chain management that are critical to the success of a business. Although many essential supply chain management issues are interrelated, the authors strive to make each chapter as self-contained as possible, so that the reader can refer directly to chapters covering topics of interest. Each chapter utilizes numerous case studies and examples, and mathematical and technical sections can be skipped without loss of continuity. The 3rd edition represents a substantial revision. While the structure and philosophy were kept intact, the authors placed an increasing importance on finding or developing effective frameworks that illustrate many important supply chain issues. At the same time, motivated by new developments in industry, they added material on a variety of topics new to the book while increasing the coverage of others.

### A STEP-BY-STEP APPROACH TO DESIGNING ACCURATE DOSING REGIMENS

Casebook in Pharmacokinetics and Drug Dosing uses real-life cases to teach pharmacy students, pharmacists, and clinical pharmacists how to apply pharmacokinetics to formulate proper dosing regimens. In order to be as clinically relevant as possible, the book not only discusses drugs with readily available therapeutic serum levels, but places equal emphasis on high-alert agents with narrow therapeutic indexes. Each drug chapter is written by clinical pharmacists who have hands-on experience in drug dosing and includes an overview of the drug's pharmacology, including: Indications Mechanisms of action Toxicities Pharmacokinetics There is comprehensive review and discussion of each drug's bioavailability, volume of distribution, clearance, half-life, therapeutic drug level monitoring, drug interactions, dosing, and availability. Each chapter is enhanced by numerous patient cases with clear step-by-step answers and explanations. Calculations, equations, and dosing recommendations are provided for each case. Sixty high-yield pediatrics cases helps students sharpen their diagnostic and problem-solving skills The Case Files series is an award-winning learning system proven to improve shelf-exam scores and clerkship performance. Unlike other books on the market, this series helps students learn in the context of real patients instead of simply memorizing. Case Files Pediatrics teaches students how to improve their diagnostic and problem-solving skills as they work through sixty high-yield clinical cases. Each case includes a complete discussion, clinical pearls, references, and USMLE-style review questions with answers. The fifth edition has been updated to include a new Case Correlations feature which highlights differential diagnosis and related cases in the book. Updated to reflect the most current high-yield clerkship topics and the latest in medical management and treatment Improve diagnostic accuracy with cases from leading international musculoskeletal radiologists "Over 70 international experts have submitted an excellent range of cases encompassing both essential concepts and encountered diagnoses. 3 Stars."--Doody's Review Service

### Musculoskeletal Imaging Cases

offers an efficient and systematic approach to interpreting imaging of the musculoskeletal system. This is a unique and one-of-a-kind anthology This casebook was first published as Davidson/de la Torre, Managing the Global Corporation, in 1989. It was the first modern case anthology for a graduate audience. This edition contains the broadest case collection of companies and countries available in a single anthology. A full 60 per cent of the cases are non-U.S.-based firms. Companies in Australia, Hong Kong, China, Mexico, South America, India, South Africa, and Europe are featured as case studies. Many of these cases were written in connection with the authors' own work consulting with the organization, making the information in-depth and credible. A full-color, case-based review of the

essentials of pathophysiology--covering all major organs and systems The goal of this trusted text is to introduce you to clinical medicine by reviewing the pathophysiologic basis of 120 diseases (and associated signs and symptoms) commonly encountered in medical practice. The authors, all experts in their respective fields, have provided a concise review of relevant normal structure and function of each body system, followed by a description of the pathophysiologic mechanisms that underlie several common diseases related to that system. Each chapter of Pathophysiology of Disease concludes with a collection of case studies and questions designed to test your understanding of the pathophysiology of each clinical entity discussed. These case studies allow you to apply your knowledge to specific clinical situations. Detailed answers to each case study question are provided at the end of the book. This unique interweaving of physiological and pathological concepts will put you on the path toward thinking about signs and symptoms in terms of their pathophysiologic basis, giving you an understanding of the "why" behind illness and treatment. Features 120 case studies (9 new) provide an opportunity for you to test your understanding of the pathophysiology of each clinical entity discussed Checkpoint questions provide review and appear in every chapter Updates and revisions throughout this new edition reflect the latest research and developments Numerous tables and diagrams encapsulate important information Updated references for each chapter topic Pathophysiology of Disease is a true must-have resource for medical students preparing for the USMLE Step 1 exam, as well as students engaged in their clerkship studies. House officers, nurses, nurse practitioners, physicians' assistants, and allied health practitioners will find its concise presentation and broad scope a great help in facilitating their understanding of common disease entities.
