Biography of Alan Roulston, currently Accountant at Accounting Solutions (NI) Ltd. Excerpt from Student's Handbook of Accounting: Solutions to Questions in Theory of Accounts, Practical Accounting, and Auditing Contained in Elements of Accounting "Elements of Accounting" was published in June, 1913. As stated at that time, it was written mainly "to bridge the gap between bookkeeping and accounting." That it has filled a real need is evidenced by the friendly reviews and comments of accountants, teachers, and lay critics. The hearty reception which has been accorded to it has necessitated three editions within a period of about a year and a half. At the request of many students and teachers, the publishers arranged with the author to produce authoritative solutions to the practical exercises appended to the respective chapters in "Elements of Accounting." To enhance the value of these solutions they have been cast into what may be termed C. P. A. form. Moreover, there have been included references for those who wish to make a further study of the points treated in the different solutions. This supplementary research material has been included in the belief that it will be welcomed by the ambitious student. This handbook should be used in connection with "Elements of Accounting." Such correlation, however, is not absolutely essential because of the fact that the exercises of the accounting text have been incorporated in the present volume. For obvious pedagogic reasons, each question is immediately followed by its answer or solution. The solutions to Groups II will probably be employed by many as much for the forms displayed and illustrated, as because they constitute solutions to specific practical accounting problems. The entire volume may be employed as a special or supplementary text in Accounting. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
