[Comprehensive Nuclear Materials](#) Jan 17 2020 Materials in a nuclear environment are exposed to extreme conditions of radiation, temperature and/or corrosion, and in many cases the combination of these makes the material behavior very different from conventional materials. This is evident for the four major technological challenges the nuclear technology domain is facing currently: (i) long-term operation of existing Generation II nuclear power plants, (ii) the design of the next generation reactors (Generation IV), (iii) the construction of the ITER fusion reactor in Cadarache (France), (iv) and the intermediate and final disposal of nuclear waste. In order to address these challenges, engineers and designers need to know the properties of a wide variety of materials under these conditions and to understand the underlying processes affecting changes in their behavior, in order to assess their performance and to determine the limits of operation. *Comprehensive Nuclear Materials 2e* provides broad ranging, validated summaries of all the major topics in the field of nuclear material research for fission as well as fusion reactor systems. Attention is given to the fundamental scientific aspects of nuclear materials: fuel and structural materials for fission reactors, waste materials, and materials for fusion reactors. The articles are written at a level that allows undergraduate students to understand the material, while providing active researchers with a ready reference resource of information. Most of the chapters from the first Edition have been revised and updated and a significant number of new topics are covered in completely new material. During the ten years between the two editions, the challenge for applications of nuclear materials has been significantly impacted by world events, public awareness, and technological innovation. Materials play a key role as enablers of new technologies, and we trust that this new edition of *Comprehensive Nuclear Materials* has captured the key recent developments. Critically reviews the major classes and functions of materials, supporting the selection, assessment, validation and engineering of materials in extreme nuclear environments *Comprehensive* resource for up-to-date and authoritative information which is not always available elsewhere, even in journals Provides an in-depth treatment of materials modeling and simulation, with a specific focus on nuclear issues Serves as an excellent entry point for students and researchers new to the field

Database Annotation in Molecular Biology Apr 19 2020 Two factors dominate current molecular biology: the amount of raw data is increasing very rapidly and successful applications in biomedical research require carefully curated and annotated databases. The quality of the experimental data -- especially nucleic acid sequences -- is satisfactory; however, annotations depend on features inferred from the data rather than measured directly, for instance the identification of genes in genome sequences. It is essential that these inferences are as accurate as possible and this requires human intervention. With the recognition of the importance of accurate database annotation and the requirement for individuals with particular constellations of skills to carry it out, annotators are emerging as specialists within the profession of bioinformatics. This book compiles information about annotation -- its current status, what is required to improve it, what skills must be brought to bear on database curation and hence what is the proper training for annotators. The book should be essential reading for all people working on biological databases, both biologists and computer scientists. It will also be of interest to all users of such databases, including molecular biologists, geneticists, protein chemists, clinicians and drug developers.

Entrepreneurship and Social Entrepreneurship in the MENA Region Dec 16 2019 This edited collection presents state of the art research on entrepreneurship and social entrepreneurship in the MENA region.

Combining practical and academic insights, it sheds light on future directions for the sector and addresses the many challenges that entrepreneurs face, for instance, the lack of special laws and regulations, lack of financial assistance and government recognition as well as the lack of social awareness. It covers topics such as entrepreneurship and sustainability, female entrepreneurship, entrepreneurship education, and future research directions. Ultimately this book aims to advance research in the field and highlights the importance of social entrepreneurs in the Middle East

The Septuagint and Modern Study Mar 19 2020 Twenty-five years after it first appeared, Jellicoe's classic work is still one of the most comprehensive introductions to the Septuagint and cognate studies. Its completeness makes it valuable not only as a textbook, but also as a reference tool for those working in the Septuagint. In bringing together the principal features of twentieth-century Septuagint studies, the author provides a wealth of valuable information. The first part of the book traces the origins and transmission history of the LXX. The second part moves to a discussion of the various LXX manuscripts, versions, and critical editions, along with a brief discussion of language and style. The appendixes, bibliography, and various indexes increase the resource value of this volume.

Inflammatory Bowel Disease Nursing Manual Nov 19 2022 This comprehensive manual discusses the many aspects of inflammatory bowel disease (IBD), providing relevant information along with practical guidance. The reader is also directed to additional resources for extra and current information. This book comes at a time when the number of people suffering from the two major forms of IBD, ulcerative colitis (UC) and Crohn's disease (CD), is rising around the globe. Despite their huge impact on daily life and health economics, these diseases are not fully understood, and diagnosis and treatment remains a significant challenge. IBD nurses are increasingly recognised as key clinicians within the multidisciplinary team caring for people with IBD. Through experience and specialist knowledge IBD nurses provide timely support, advice, and treatment for people living with this unpredictable condition. IBD nurses are also well placed to liaise with the wider team, developing patient centred services which best fit their local health framework. The combined international

expertise and accessible guidance here will equip nurses, or any clinician wanting to increase their competence in IBD management. Thereby this manual aims to contribute to the optimisation of IBD care throughout the world.
